

## **Clarion Limestone School District Understanding Our Threat Assessment Team**

Dear Clarion Limestone School District Community,

The safety and well-being of our students, staff, and community members are our highest priorities. To enhance our efforts in maintaining a secure and supportive environment, we want to share some important information about a vital resource within our district: The Threat Assessment Team.

What is the Threat Assessment Team?

The Threat Assessment Team is a group of specially trained professionals within our school district whose primary responsibility is to ensure the safety of everyone in our school community. The team is composed of administrators, counselors, school psychologist, law enforcement officers, and other relevant staff members. Their collective expertise allows for a comprehensive approach to evaluating and addressing any behaviors or communications that may suggest a potential threat to the safety of others or the individual themselves.

What Does the Threat Assessment Team Do?

The primary role of the Threat Assessment Team is to identify, assess, and manage situations where there may be a threat of violence or harm. Here are the key functions the team performs:

1. Identification: The team receives information from students, staff, parents, or community members about any concerning behaviors, communications, or situations that may pose a risk.
2. Assessment: Once a potential threat is identified, the team assesses the situation carefully. This involves gathering information, interviewing those involved, and evaluating the severity and credibility of the threat.
3. Intervention: If the assessment determines that a real threat exists, the team works collaboratively to intervene. This could involve counseling, conflict resolution, or, if necessary, involving law enforcement to ensure the safety of all.
4. Prevention: The team also plays a proactive role in educating the school community about identifying warning signs of potential threats and encouraging open communication. Their goal is to create a safe and supportive environment where concerns can be raised before situations escalate.

How is the Threat Assessment Team Used?

The Threat Assessment Team is a preventive tool, designed to act before any potential harm occurs. When someone—whether a student, staff member, or community member—reports a

concern, the team steps in to conduct a confidential assessment. By working behind the scenes, they help to address situations early, with the goal of de-escalating any potential dangers and providing appropriate support to those involved.

If you, or someone you know, notice any concerning behaviors or feel that there may be a safety risk within our schools, we encourage you to reach out. Every report is taken seriously and is treated with the utmost care and confidentiality.

### A Safe and Supportive School Community

The creation and implementation of the Threat Assessment Team is just one of the many ways the Clarion Limestone School District is committed to protecting our students, staff, and community. We believe that by working together and remaining vigilant, we can maintain a safe, positive environment where every student has the opportunity to learn and grow without fear.

If you have any questions or would like to learn more about the Threat Assessment Team and its role in our district, please feel free to contact us.

Thank you for your support and commitment to the safety of our school community.

Sincerely,

Brian Weible  
Superintendent  
Clarion Limestone School District
